SIX PILLARS TO SUCCESS

AUDIT - Know what your customers have, so you know how to monitor.

MONITOR - Constantly watch for out of band indicators to identify problems.

ALERT - Ensure the right people get the information to act before critical issues occur.

REPORT - Deliver meaningful and useful reports to your clients to demonstrate value.

REMEDIATE - Use the right remote solutions to solve your customers' problems without disruption to their business and to maximise your efficiencies.

SECURE - Keep your customers safe with industry leading antivirus, web protection, patch management and advanced protection.

SYSTEM REQUIREMENTS

Delta Vision is fully hosted by Delta Technology Solutions. As a busy MSP, monitoring and maintaining solutions in house adds overhead to both your operating costs and to your capital expenditure. Delta shoulders this burden for you, so you don't have to.

Vision requires an agent be deployed on the end points being monitored and man-

> Delta Vision is fully hosted in secure Delta data centres. 24/7 monitoring of Delta systems provides you maximum uptime and peace of mind.
